2050 climate strategy

Biobased construction for a sustainable future

In late February 2025, the International Wood Construction Forum is returning to Paris, the world's leading centre for the biobased construction industry. In the heart of the capital, the recently renovated Grand Palais will be showcasing the very best developments in construction in a venue that lives up to the challenges of climate change.

The meeting for decision-makers and actors in the biobased construction, renovation and fittings sectors

A unifying Forum
